

Thank you for your interest in MSC's revolver match. On September 19, 2020, we will hold our second match designed for action shooting (rapid fire) with six-shot, center-fire double action revolvers.

Because this is a new endeavor and MSC must meet County mandated Covid 19 mitigation measures, we are initially limiting matches to the first 20 shooters who confirm their participation. Participants are asked to bring masks and be prepared to comply with Covid 19 restrictions.

We will be shooting steel targets at short to medium range. Eye protection is mandatory and to ensure the safety of participants and avoid damaging our targets, the following ammunition guidelines apply:

- **Lead or frangible bullets only. No jacketed bullets or gas checks.**
- Maximum .38/.357 load not to exceed equivalent of standard 158 grain .38 Special round nose lead.
- Maximum "Big Bore" loads not to exceed equivalent of factory "cowboy" loads.
- Ammo may be checked. Lite loads are encouraged.

## **EQUIPMENT**

The only equipment needed to participate in this match is a safe and functional six shot, double-action center-fire revolver, a safety chamber flag (available at MSC for \$1) and appropriate ammunition. Since this is a timed event, speed loaders are highly recommended (at least two).

There are several categories for the revolvers used, based on caliber and other factors.

This is not an event for beginner shooters. While participants need not be expert shooters, they should be knowledgeable and competent in the use of their revolver.

## **MATCH PROCEDURE**

- The match consists of multiple “stages”, each with an array of steel targets and a “scenario” that directs the shooter how to engage the targets.
- The shooter will fire under the supervision of a Range Officer.
- Three non-shooter competitors will serve as “counters”, tasked with counting misses and identifying penalties.
- The shooter’s score will be time plus any penalties.
- Match will consist of 3 physical stages. Each stage will be shot twice, for a total of six scored stages.
- Stages will require 18 to 24 rounds each.
- All shots are double action.
- Guns will be brought to firing position empty, muzzle pointed up, with the cylinder open and a chamber flag inserted in the cylinder end of the barrel.
- Loading will be done under supervision of the R/O.
- After firing, guns will be cleared at the firing position and checked by R/O.
- Guns are removed from firing line in same condition as brought to firing line.

Registration for the match will begin at 8:00, with a mandatory safety briefing at 9:00. The match fee is \$10 (exact change is greatly appreciated) and participants will be required to fill out a MSC waiver form. If you want to confirm participation advise me via this e-mail. For now, only one “match” per person. We hope to expand our capacity in the future. Detailed match guidelines are available via e-mail upon request. Thanks and see you on the 19<sup>th</sup>.
